

Agronomy Research Intern - Waupaca, WI

Position Summary:

The Agronomy Research Intern will assist the Research Agronomist and the Legacy Alfalfa Team at the Legacy Seeds - Research & Learning Center in Waupaca, WI. The candidate will be exposed to every aspect in operating and maintaining a research farm focused on corn, soybean, and alfalfa production. The candidate will assist the alfalfa team with a variety of tasks associated with developing new and improved alfalfa varieties.

Supervision:

Reports to the Research Agronomist; takes direction from the Legacy Alfalfa Team.

Responsibilities:

- Assist in organizing, establishing, maintaining, and evaluating field research plots across WI
- Ride along with Research Agronomist to provide customer support on product performance throughout the state
- Aid in planning and hosting plot tours at the Research & Learning Center and throughout the state
- Compile observation data using Microsoft 365 programs
- Assist in upkeep of the Research & Learning Center building and grounds.
- Safely operate equipment and tools

Qualifications:

- Pursuing an associate's or bachelor's degree, preferably in agronomy, agricultural business, or related field of study
- Must hold a valid driver's license and have a good driving record
- All applicants must be eligible to work in the U.S.
- Flexible hours and/or extended hours may be required
- Ability to move, lift, and carry boxes, tubs, and tools weighing 50-60 lbs. across uneven ground

Desired Skills:

- Strong communication, leadership, and time-management skills
- Attention to detail and ability to work without supervision
- Give and receive feedback to collaborate with others
- Ability to adapt to changing work environments
- Agricultural background is beneficial, but not required
